RE: Exhumation of

Dear Miss Shanahan:

We are checking into the above mentioned matter with the cemetery and the local health office. Both need to give their consent. There are several questions to be answered.

The cemetery needs to know who the people are that authorized this exhumation and their relationship to the deceased.

The Health Office wants to know the reason for the exhumation and what you expect to prove or find out.

Our experience and that of the Health Office and the cemetery advises that after 30 years there will be nothing left to exhume except possibly the bones.

If this person is radio-active, both the cemetery and our company will not exhume and ship the remains.

As a tax payer and interested in how our tax dollars are spent, I would like to know something of your organization and what this exhumation will prove and what benefit your findings will be to humanity.

The total cost would be forwarded to you after your reply.

Very truly yours,

Herbert W. Rech
Vice President
